Title: Perfect score:

US-10-004-176-6 1713 1 VEASGIGPEVPDDRDFEPSL.....QPSTFRCVYVRSAIQLGNYK 329

Scoring table:

BLOSUM62 Gapop 10.0 , Gapext 0.5

Searched: 127863 seqs, 47026705 residues

Total number of hits satisfying chosen parameters: 127863

Minimum DB seq length: 0
Maximum DB seq length: 200000000

Post-processing: Minimum Match 0% Maximum Match 100% Listing first 45 summaries

Database : SwissProt\_41:\*

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Hering T.M., Kollar J.;
Hering T.M., Kollar J.;
"The primary structure of rabbit chondrocyte decorin deduced nucleotide sequence.";
Submitted (NOV-1993) to the EMBL/GenBank/DDBJ databases.
-I-FUNCTION: May affect the rate of fibrils formation (By similarity).
-I-SUBUNIT: Binds to type I and type II collagen, to fibrone of the collagen of the collagen of the collagen.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             SEQUENCE
